

ACOUSTIC SLAT PANELS

Our Acoustic Slat Panels are expertly crafted to offer both exceptional sound absorption and contemporary design aesthetics. These panels are the perfect solution for residential and commercial spaces, providing effective noise reduction while enhancing the overall visual appeal of your interiors.

SOUND ABSORPTION COEFFICIENTS

| Frequency (Hz) | 125 Hz | 250 Hz | 500 Hz | 1000 Hz | 2000 Hz | 4000 Hz |
|------------------------|--------|--------|--------|---------|---------|---------|
| Absorption Coefficient | 0.22 | 0.45 | 0.75 | 0.90 | 0.92 | 0.85 |

Applications

Home Theaters: Elevate sound clarity and significantly reduce background noise for a cinematic experience.

Offices: Drastically minimize ambient noise to enhance focus and productivity.

Studios: Ensure pristine, accurate sound for professional-grade recording and mixing.

Conference Rooms: Enhance communication by effectively reducing echoes and reverberation.

Hotels & Restaurants: Create a tranquil and peaceful environment by minimizing disruptive noise.

Residential Spaces: Combine elegance with sound control for a quieter, more serene home.

PRODUCT SPECIFICATIONS

| Attribute | Details |
|----------------------|--|
| Panel Dimensions | 94.5 × 25 × 0.87 in (H 94.49" x W 25.20") |
| Available Colors | Smoke Oak, Walnut, White Oak |
| Material Composition | High-quality sustainable wood and acoustic backing |
| Weight | Approximately 10 kg per panel |
| Installation Method | Wall-mounted; easy installation with screws & adhesive |

PHYSICAL PROPERTIES

| Property | Details |
|---------------------|---|
| Dimensions | 94.5 × 25 × 0.87 in |
| Panel Thickness | 0.87 inches |
| Material | High-quality sustainable wood |
| Weight per Panel | 10 kg |
| Fire Resistance | Class A (optional fire-rated option available) |
| Moisture Resistance | Resistant to humidity, suitable for indoor use |
| Durability | Highly durable, scratch and impact-resistant |
| Sound Absorption | Noise reduction coefficient (NRC) of up to 0.90 |

BENEFITS

Superior Sound Absorption: Effectively reduces noise, minimizing echoes and unwanted reverberation for enhanced sound clarity.

Modern Aesthetic: Sleek, sophisticated slat design that complements a wide variety of interior styles, adding a refined touch to any room.

High-Quality Materials: Built from durable, sustainable materials, ensuring long-lasting performance in any environment.

Easy Installation: Panels are designed for hassle-free installation, making them ideal for quick projects or large-scale applications.

Versatile Applications: Perfect for home theaters, offices, recording studios, conference rooms, and more.
